

School Improvement

Our Vision

We envision a future where all people have access to equitable and excellent opportunity to thrive and live the lives they desire. We look to a future where education and economic systems are equitable, responsive, and inclusive, and where zip codes, race, and social factors no longer predict life outcomes.

Strategy in Practice

We work with schools, districts, authorizers and state education agencies to consistently deliver effective and sustainable school improvement plans and strategies. Our asset-based approach to improvement assumes that the families, students, and teachers have the skill and the will to bring about change.

CROSS-SECTOR

What We Do

Data-driven, Community-centered, Equity-focused

- Support statewide design and implementation of school improvement strategies
- Use comprehensive data and stakeholder engagement to understand needs and set priorities
- Facilitate root cause analyses
- Select evidence-based programs and practices with schools and districts
- Apply implementation and change management research to improve systems
- Facilitate agency staff to evaluate and improve education initiative
- Pair academic and social emotional supports to improve conditions for improvement
- Design and facilitate networked improvement communities and professional learning
- Guide and support the unique learning needs of school improvement coaches
- Support school-community-family engagement strategies
- Assess and improve college and career readiness initiatives and provide indicators of readiness and success
- Coach school leaders to develop and improve their capacity to lead change
